

<Errors>

The screenshot shows an Internet Explorer browser window with the address bar displaying `http://192.168.194.181:9081/test/ckeditor431/samples/replacebycoc`. The page content includes a CKEditor sample with a code editor showing `CKEDITOR.replace('text'` and a text area containing the heading "Apollo 11".

A "Compatibility View Settings" dialog box is open in the foreground. It has a title bar with a close button. The dialog contains the following elements:

- A "Change Compatibility View Settings" icon and label.
- An "Add this website:" section with a text input field containing "192.168.194.181" and an "Add" button.
- A "Websites you've added to Compatibility View:" section with a list box containing "192.168.194.181" and a "Remove" button.
- Two checkboxes: "Display intranet sites in Compatibility View" and "Use Microsoft compatibility lists".
- A link: "Learn more by reading the [Internet Explorer privacy statement](#)".
- A "Close" button at the bottom right.

A red callout box with the text "Add Website" points to the "Add" button in the dialog. A red arrow points from the "Compatibility View settings" option in the Tools menu to the "Add" button. The Tools menu is open, showing options like "Fix connection problems...", "Reopen last browsing session", "Pop-up Blocker", "View downloads", "Manage add-ons", "Compatibility View settings" (highlighted with a red box), "Full screen", "Toolbars", "Explorer bars", "F12 Developer Tools", "Suggested Sites", and "Internet options".

CKEditor Samples » Replace Textarea Elements Using JavaScript Code

This editor is using an `<iframe>` element-based editing area, provided by the **Wysiwygarea** plugin.

```
CKEDITOR.replace( 'textarea_id' )
```
